

Experience

Gantri / Senior Product Designer

3D-Printed Lighting Brand & Manufacturer

June 2022 - Present San Francisco, CA (Remote)

End-to-end product design for Gantri's internal Manufacturing Execution platform. This platform is used by teams across the org to produce items, fulfill orders, manage inventory, manage product versions, track revenue transactions, manage flow of production, and more.

Drive product discovery by engaging user research, complex workflow mapping, and rapid prototyping to understand key problems and evaluate potential solutions. Own feature prioritization, based on impact and effort.

Chargify (now Maxio) / Design Manager

Subscription Billing Platform for B2B SaaS Products - *Fintech SaaS*

March 2021 - June 2022 San Antonio, TX

Designed key billing management features for subscription businesses processing hundreds of millions in ARR. These features were key to Chargify's strategic growth and market position (Multi-Currency Support, Custom Price Points, Re-architecting Product Catalog, etc.)

Defined the collaboration process between Design, Product, and Engineering (PDLC) during the Chargify / SaaS Optics merge into Maxio. Led the creation of a new Design System that standardized patterns across the Chargify and SaaS Optics platforms.

Chargify (now Maxio) / Product Designer

Subscription Billing Platform for B2B SaaS Products - *Fintech SaaS*

September 2018 - March 2021 San Antonio, TX

Designed, prototyped, and handed off complex interfaces for core billing features. Functioned within a tight-knit team of Product Manager and developers to ensure technical feasibility and high-quality execution throughout handoff. Continuously improved Chargify's design system through user research, maintaining Figma Tooling, and pushing changes to component library.

esd & associates / Designer

San Antonio Digital Marketing Agency

September 2016 - September 2018 San Antonio, TX
